1. Name of the Programme – BACHELOR OF DESIGN – Interior Design (B.Des) Under the faculty of Interdisciplinary Studies (IDS)

2. PREAMBLE:

The word DESIGN embraces all activities of human being we cannot name any field where Design activity is not involved. The meaning of word Design indicates that it is a systematic effort to analyze the end product, understand its function and design with such ingenuity as to have a unique combination of appropriate material, technology and aesthetic values to blend with choice of material and end use selected. In today's world where all activities are market driven, the importance of designing the environment with total emphasis on human comfort and sustainability is the mantra to succeed. This activity of Designing brings in to its fold built and un-built environment and calls for very sensitive designers who will constantly endeavor to enhance the quality of our surroundings. The activity embraces vital fields such as the buildings we occupy, the interior designing of the Spaces, Product Design, Furniture Design, Visual Communication, Apparel Design etc. This will explain the broad scope of the subject and its importance in our everyday life. It is also pertinent to note that a lot of research has been carried out on the psychological and visual aspects of Design and it is proved that the faculty of human being to produce more and with creativity gets enhanced in such well-planned and aesthetically designed environments. Well planned office buildings with work conducive interiors, well laid out landscaped gardens;

Supplement by minute detailing of product design signage etc. is an example of well-planned environment. This course is being introduced young and sensitive designers in various disciplines such as Interior Design, Product Design, Furniture Design, Set Design, Visual Communication Designation is felt that after pelting this course the graduates will have ample scope to work or practices Interior Designers, is so immense that the Designers will have sky as the limit for success. Due to globalization and GATE trade agreements in force, the Designers will have ample scope to work anywhere in the world and enhance the quality of work of human life around. Since Shivaji University is one of the pioneers to start this course, we feel that this and it will be able to provide good outlet to young talented Designers to show their creativity. We

hope that those students, who are on the outlook of some different profession, will be able to find fulfillment in this course. Since this is a self-employment-oriented course, graduates are likely to practice independently or alternatively find jobs with Co-Corporate Offices, Industrial Houses, Films and Advertisement Industry etc.

By considering limitations regarding – (1) Response of students (2) Infrastructure available in institute, we have started only one course i.e. Interior Designing for this academic year 2006- 2007. In syllabus we have tried to give every student the opportunity to in the degree course.

we would like to give them opportunity for further higher studies. This providing some qualified Interior Designers to ever demanding designing profession. Interior Design is the main subject in the curriculum, which focuses on the practical application of all the theory subjects in the design studio. It aims at allowing the student to develop his Designing skills by actually getting involved with progressively difficult design problems.

Realization of Interior Design profession today creating comfortable functional and aesthetically appealing harmonious interior Environment.

Course Outcomes:

- Develop the design work considering basic elements of design;
- Apply principles of design in design work;
- Select color and texture to suit the visual effects, psychology and point of application; Sketch the design considering basic elements, principles and visual effects
- Apply principles of planning in interior design;
- Apply the anthropometric theory in interior design
- Select/list material for the interior design work;
- Select the products for given interior design work;
- Develop interior design for small residential units.

Assessments:

Teacher Assessment:

Assessment	Marks	Min
Internal Oral Examination	50	20
External oral Examination	-	-
End Semester Examination	50	20

Course Contents:**Theory of Design****Unit 1**

Basic Elements of design & application in studio work. Basic principles of design & application in studio work.

Unit 2

Color planning –Visual effects/ Psychology/ Application. Texture planning –Visual effects / Application.

Interior Design**Unit 3**

Man and his basic living activity. Man and anthropometric studies in relation with living activities. Functional analysis anthropometrics, space planning for living activity. Materials and use of structural systems, build form and its expression. Light- Air and Views as an issue.

Unit 4

Approach towards design with the help of Product Design in relation with living spaces, data collection, survey and analysis of existing product. Study based on qualitative aspects of space through small design exercises preferably small residential living spaces like, living room.

Workshop is to understand material and tools by making objects which allow students to explore forms, surfaces, textures, and patterns i.e. elements and principles of design from Theory of Design & Visual Arts. Explore different joinery, support conditions and woven surfaces under trained experienced master craftsman. Also clear to communicate and establish dialogue between designed crafts skills.

Perceive and understand materials and tools by exploring. The help through visual learning. To established design & craft skill relationship and revel through appreciation of the profession.

Experiential work shop methods are but suite for such learning when craft, print, color, etc elemental activity may be conducted.

Course Outcomes:

- Develop the design work considering basic elements of design;
- Apply principles of design in design work;
- Select color and texture to suit the visual effects, psychology and point of application;
Sketch the design considering basic elements, principles and visual effects
- Develop shapes and sizes from clay and ceramic;
- Select, handle and operate tools in making clay & ceramic models;
- Apply color scheme based on the object;
- Establish/demonstrate the design and craft skills.

Title of the Course:	Open Elective – I	L	S	H	Credit
OE	OE – I Calligraphy	2	-	30	2

Course Description:

As per the policy framework of skill development envisages that skilling will be integrated with formal education wide range of courses would be available across the discipline under course category of skill enhancement courses. This course open elective gives value added education skill enhancement of skill set to the syllabus required for the program in each year as per the need of industry and time.

Skill enhancement courses are classified into two categories i.e

1. Skill based
2. Value based

The set of open electives can be changed as per the need of the industry and time.

Course Outcome: -

After completing such courses, students have to submit the certificate to the commission college then after verification of the certificate the respective college will communicate the credit to the examination section of the university to deposit the credits in ABC.

- Open Electives credits will enhance skill based knowledge required for syllabus to be a designer and for higher education.
- Open Electives credits will enhance value based knowledge required for syllabus to be a designer and for higher education.
- This open elective will add knowledge to entire in to industry ever demanding interior industry.
- This open elective may give students to add to change, path to multi-disciplinary programs as anticipated in NEP 20 for industry or higher education.

Teachers Assessment:

External oral Examination	-	-
End Semester Examination	50	20

Course Contents:

Unit 1

Functions of structure (Load bearing, Frames structure and steel structure).

Introduction of building super structure and their terminology.

Unit 2

Different types of brick bonds – Stretcher bond, header bond, English bond, Flemish bond

Stone masonry structure – course masonry un course masonry, rubble masonry, ashlar masonry etc

Unit 3

Study of Building Materials like Clay products, Brick, Stone, Cement their uses types' strength of materials.

Unit 4

Studio Work based on the above which can be expressed through model making also. Market surveys based on above mentioned different materials. Introduction to tools used in construction & furniture making. Understanding and exposure of hardware, etc.

Title of the Course:	Democracy Elections & Good Governance	L	S	H	Credit
AEC/VEC/IKS	VEC – I	1	4	30	2

Course Description:

Democracy is derived from the Greek word ‘Krates’ meaning power or rule. Democracy thus means rule of the demos (the demos referring to the people, although the Greeks originally used this to mean the ‘poor’ or the ‘many’. Thus democracy essentially links to the govt to the people and hence Abraham Lincoln’s famous definition of –Democracy is government of the people, by the people and for the people– rightly expresses the spirit of democracy. Very broadly, democracy may mean the following 1. The system of rule by the poor and disadvantaged. 2. A form of government in which the people rule themselves directly and without the need for professional politicians or public officials. 3. A society based on equal opportunity and individual merit rather than hierarchy and privileges. 4. A system of welfare and redistribution aimed at narrow social inequalities. 5. A system of decision making based on the Principle of majority rule.

Course Outcomes:

The outcomes of democracy include an accountable, responsive, and legitimate government, accommodating social diversity, and ensuring individual dignity and freedom. While not a guarantee of economic growth or poverty reduction, democracy provides mechanisms for resolving conflict and correcting mistakes, and it facilitates greater transparency and public participation in decision-making.

Quick sketches are used to explore and capture initial design ideas and spatial relationships without committing to a single direction.

2. Communication:

Sketches provide a quick, tangible way to convey design intent to clients, contractors, and team members, clarifying complex 2D plans and adding a personal touch.

3. Mood and Ambiance:

Painting and colouring add realism, atmosphere, and life to a sketch, helping to show the desired mood and emotional impact of a space

4. Detailing:

Sketches are used to refine specific details, experiment with different options for furniture, finishes, and textures, and ensure all components fit together harmoniously

Course Outcomes:

The outcome of sketching can be a recorded visual memory, a developed idea for a future work, a quick demonstration of a concept, or a functional tool for communication in design. Beyond artistic creations, sketching offers significant personal benefits such as enhanced cognitive function, emotional expression, improved motor skills, and increased confidence. In professional contexts, sketching is vital for conceptualizing and refining ideas during the early stages of a design process, fostering creativity and facilitating communication.
